SOLUTION FACT SHEET

XMPP/Jabber Blackberry Client
Powered by Vayusphere ™

Description:

Secure, Robust Instant Messaging Client for your RIM Blackberry

Vayusphere is the leading provider of Instant Response server software and solutions. Instant Response solutions are designed to help organizations rapidly resolve mission-critical business problems and events where the cost of delayed response is high.

What is XMPP ?

Extensible Messaging and Presence Protocol, or XMPP, is an open, XML-based protocol for near real-time extensible messaging and presence events.

Availability:

Vayusphere's Blackberry Client for XMPP is available upon request by emailing sales@vayusphere.com.

Vayusphere operates a guest wireless gateway for trials, but your enterprise may also purchase Vayusphere's Proxy Gateway for deployment behind your firewall.

XMPP/Jabber Blackberry Client: Powered by Vayusphere

The Vayusphere XMPP Messenger solution for RIM Blackberry provides a robust, reliable Instant Messaging solution for your wireless needs. Vayusphere XMPP Messenger solution interoperates with all standards compliant XMPP/Jabber servers, including Google Talk
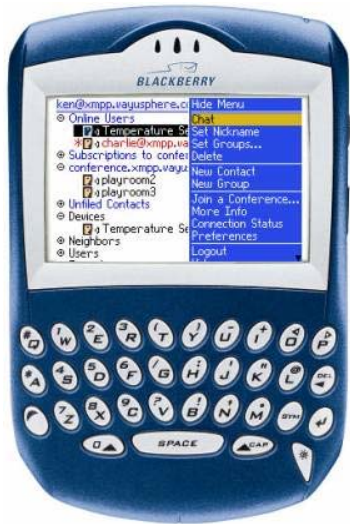

A unique wireless-friendly proxy gateway provided with the solution ensures continued coverage even as the device travels through wireless dead zones. Messages are queued, and immediately delivered when the device returns to a coverage area. A connection to the IM server is maintained throughout

About Vayusphere

Vayusphere is the leading provider of Instant Response server software and solutions. Instant Response solutions are designed to help organizations rapidly resolve mission-critical business problems and events where the cost of delayed response is high. Vayusphere Instant Response software and solutions enable companies to leverage and extend their investments in Enterprise Application Integration (EAI) and Instant Messaging (IM). Vayusphere is headquartered in Mountain View, CA

SOLUTION FACT SHEET

XMPP/Jabber Blackberry Client
Powered by Vayusphere ™

Vayusphere's Blackberry Client and Wireless Proxy for XMPP Servers

Features:

• Full function XMPP client with encryption and TLS support

• Always On. Integrated Blackberry experience with a always on mode that enables the client to continue running in the background even if you switch to another application

• Vayusphere's unique Wireless Proxy Gateway ensures continued coverage and connectivity for your IM client even when you go through wireless dead zones. The gateway queues presence updates and messages when the user temporarily goes out of coverage. This enhances the wireless experience by eliminating lost messages, minimizing bandwidth, and minimizing continuous presence changes in low coverage areas.

• Single-party and multi-user chat. Vayusphere XMPP Messenger client uniquely supports Multi User Chat rooms and Persistent Channels

• An Administrator's interface to the Wireless Gateway Server enables administrators to view and manage wireless IM connections.

• Does not require a Blackberry Enterprise Server
